

Same 128 prompts and weighting: coverage vs alignment

Top-3 coverage difference (pp)

Target-draft overlap = $1 - \text{TV}(p_T, p_D)$
farther on left; closer on right

Full-vocabulary alignment difference

Target-draft overlap = $1 - \text{TV}(p_T, p_D)$
farther on left; closer on right

P1 off, exit 56, T = 1 | pooled first-rejection weights | pointwise 95% prompt CI
Alignment: dot product with true correction distribution; not top-k cache hit
